#### **DETAILED ACTION**

This action is responsive to the amendment filed 08-11-2003, which has been entered.

Claims 1-47 are currently pending.

## Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 46-47 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 46, the phrase "and/or" renders the scope of the claim indefinite because it is not clear if the phrase is used as an inclusive or exclusive language and it is not clear as to what is mean by the phrase "essentially prevent"

In claim 47, the term "sufficient" renders the scope of the claim indefinite because it is not clear how much thickness is considered sufficient radial thickness. In addition, it is unclear as to what is mean by the ring having three-dimensional cross-section.

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 46-47 as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Jones ('019). Jones discloses a pulley body (12), which has a rotationally

Application/Control Number: 09/673,135

Art Unit: 3682

symmetrical outer circumference, a pulley hub (not labeled), and a tire (13) which sits on the circumferential surface (not labeled), the tire has a radially outer ring section (the outer portion of the tire 13.), and a reinforcement ring (15), a radially inner ring section (16), the reinforcement ring is made from a rigid material. The reinforcing ring may have three different cross-sections depending on the direction of the cross-section. In addition, it is apparent the rope load is distributed uniformly over the inner ring and to prevent local deformation of the inner ring.

## Allowable Subject Matter

5. Claims 1-45 are allowed.

### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Application/Control Number: 09/673,135
